Remote Notaries and Related Issues

Since the onset of Covid, the need to engage remote notaries to facilitate real estate transactions has continued to increase. And while the laws have been changing to accommodate these new practices, many things remain unclear. Can a remote notary certify identify if the consumer holds up his driverâ??s license to the computer screen in a video conference? Can knowledge-based authentication be accomplished if the consumer has no taxpayer identification number? Does a scanned copy of a wet ink signed document constitute an original for electronic recording, or must the one recording have the

physical document in hand? How are fraudsters taking advantage of these rules? These and other questions are explored in this presentation.
